

Digital Appendix for:

An algorithm to simulate synthetic spectrum-compatible bi-directional ground motions with specific directionality

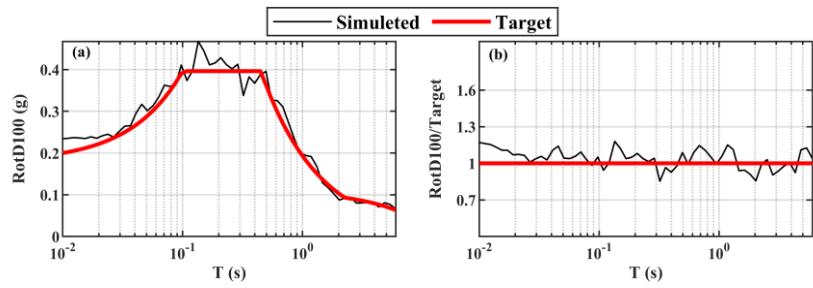

Jian Zhou, Akira Igarashi

Disaster Prevention Research Institute, Kyoto University

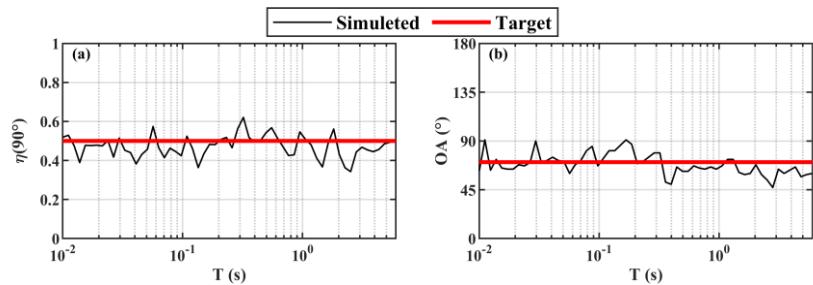

Results obtained using the CJJ RotD100 response spectrum

No. 1

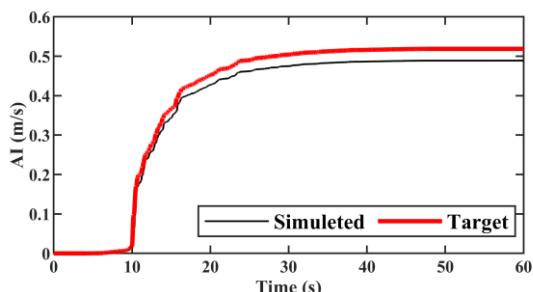

RotD100 response spectrum

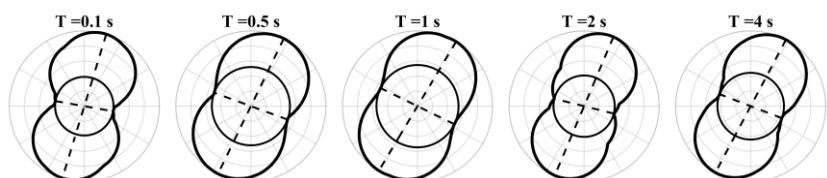

Directionality

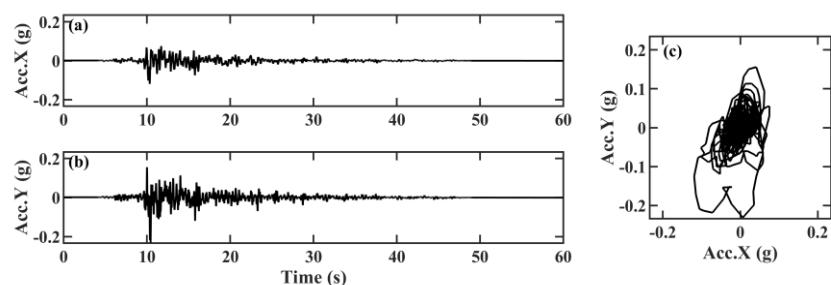

Arias intensity

Spectral demand over all horizontal directions

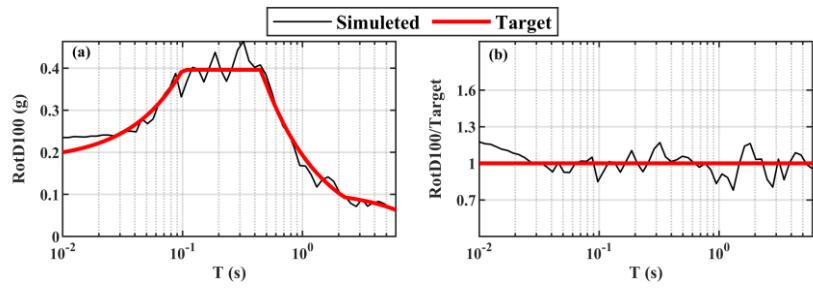

Acceleration time history

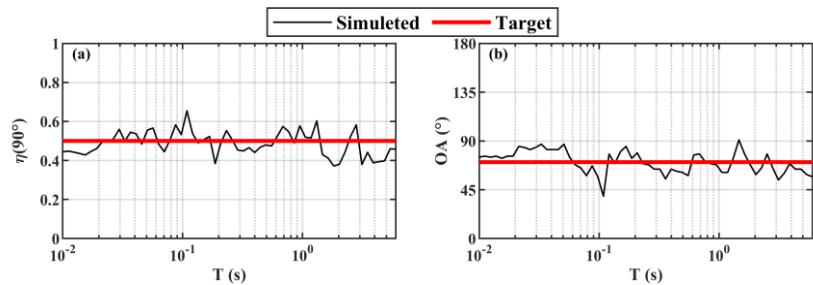

No. 2

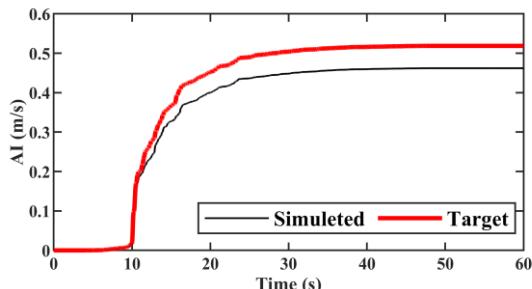

RotD100 response spectrum

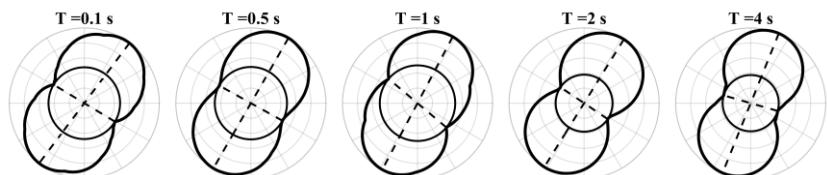

Directionality

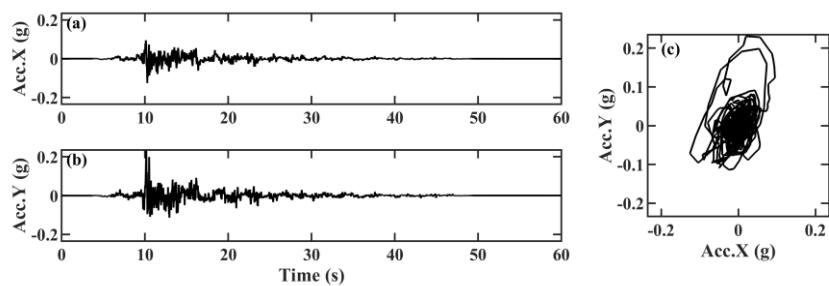

Arias intensity

Spectral demand over all horizontal directions

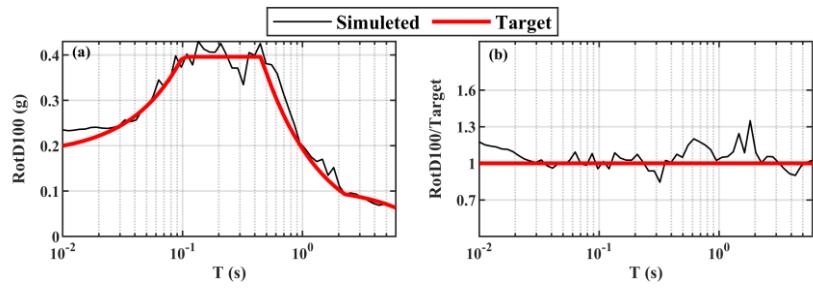

Acceleration time history

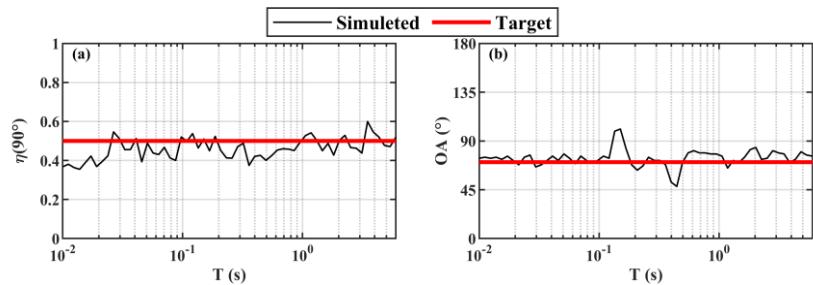

No. 3

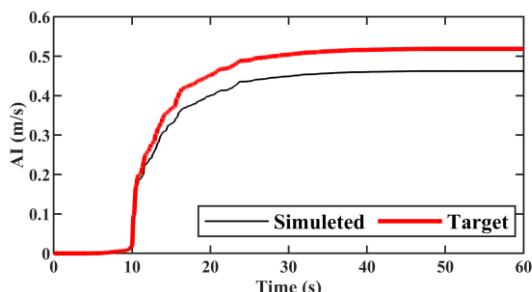

RotD100 response spectrum

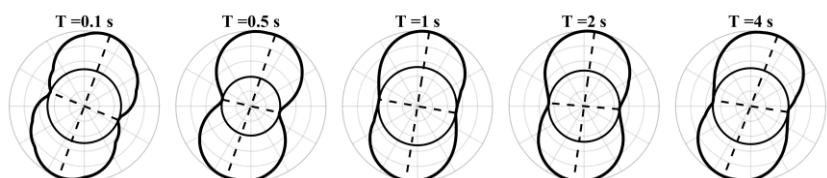

Directionality

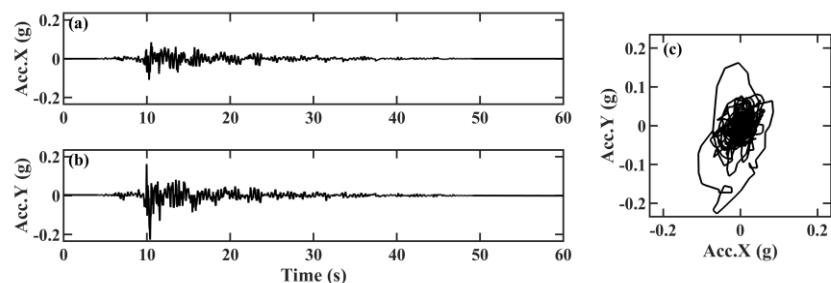

Arias intensity

Spectral demand over all horizontal directions

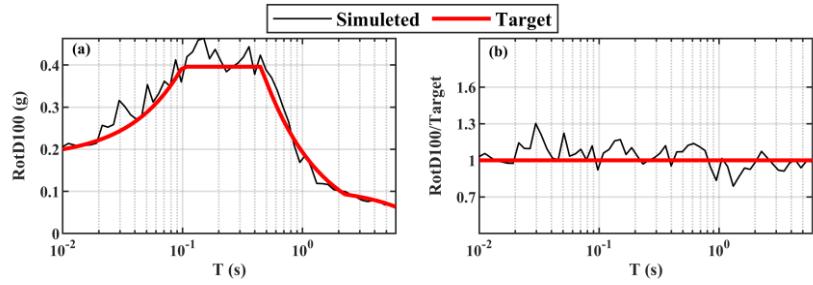

Acceleration time history

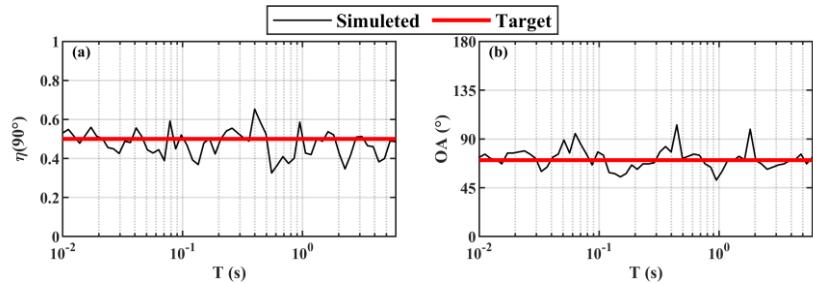

No. 4

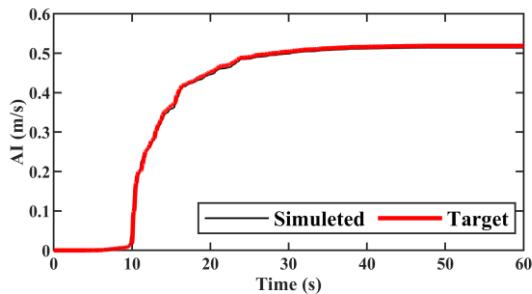

RotD100 response spectrum

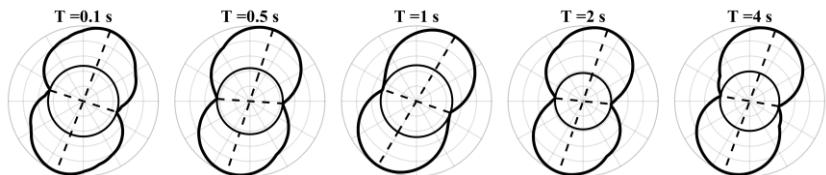

Directionality

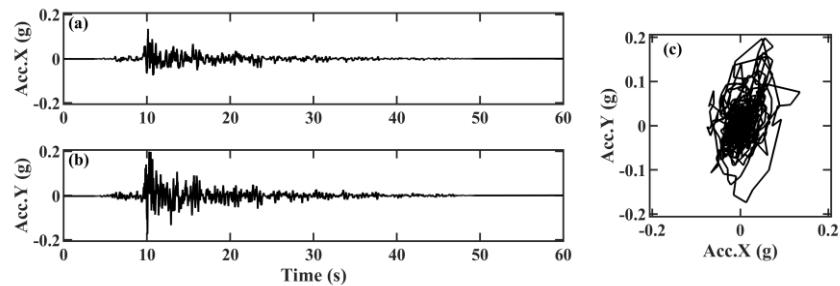

Arias intensity

Spectral demand over all horizontal directions

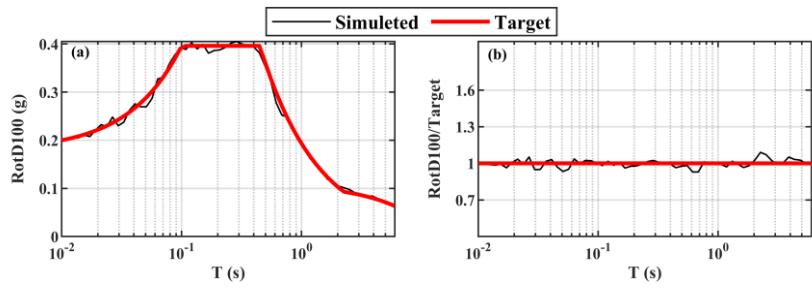

Acceleration time history

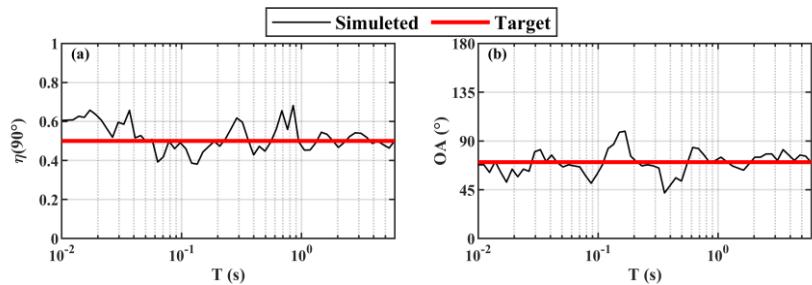

No. 5

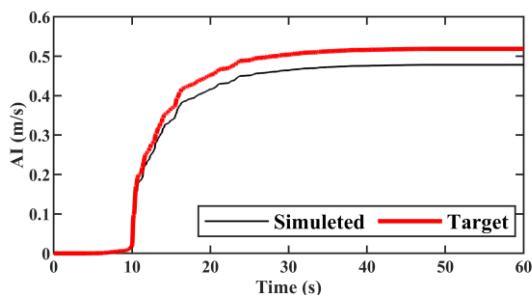

RotD100 response spectrum

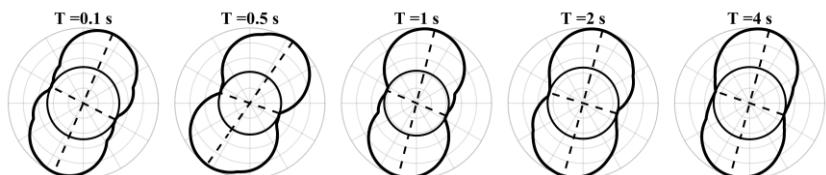

Directionality

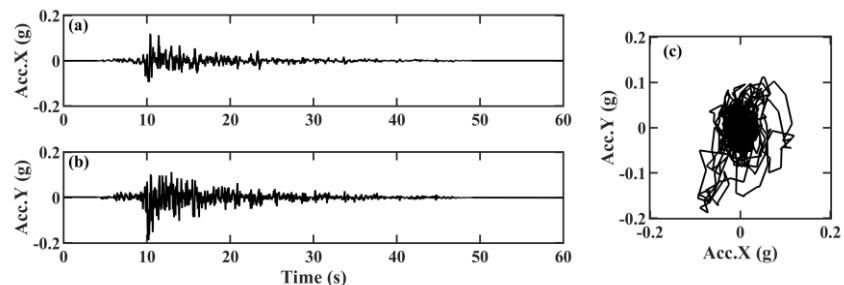

Arias intensity

Spectral demand over all horizontal directions

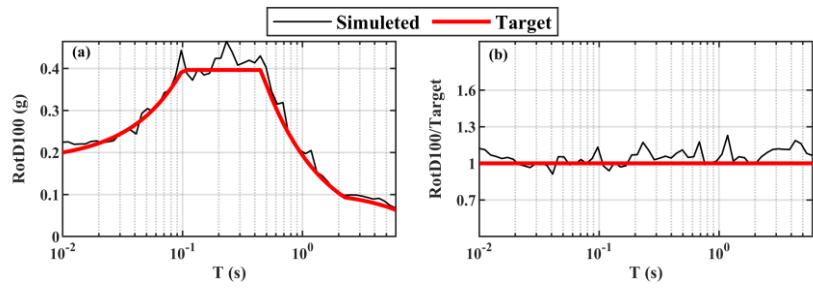

Acceleration time history

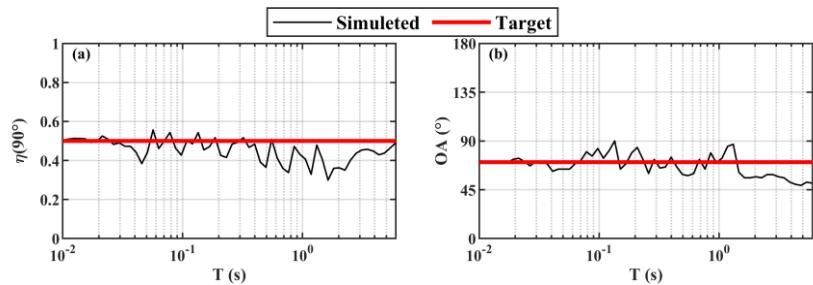

No. 6

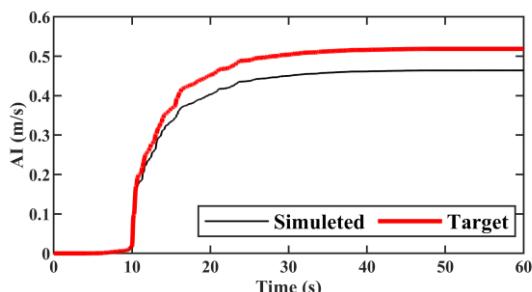

RotD100 response spectrum

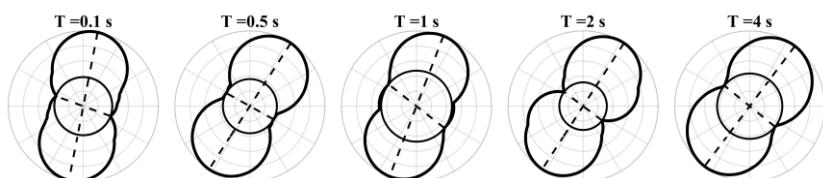

Directionality

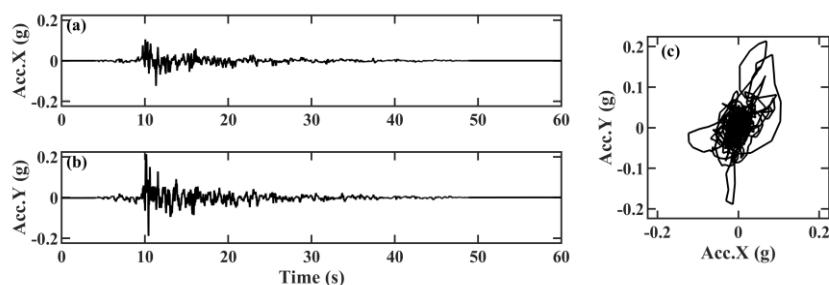

Arias intensity

Spectral demand over all horizontal directions

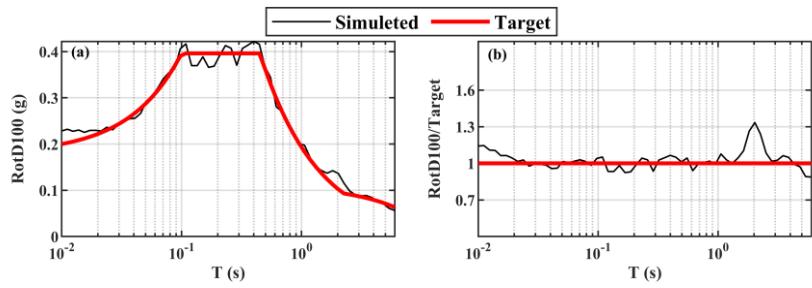

Acceleration time history

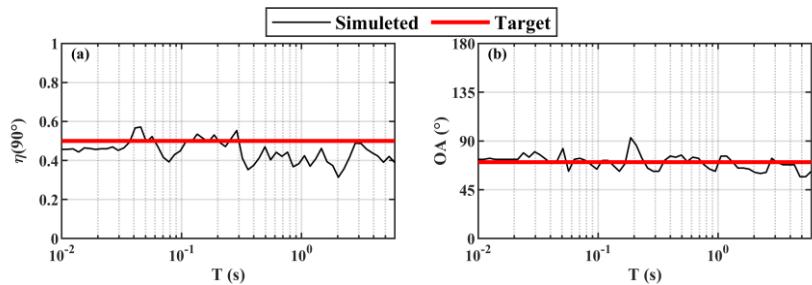

No. 7

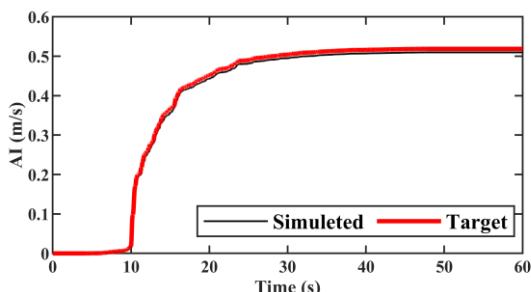

RotD100 response spectrum

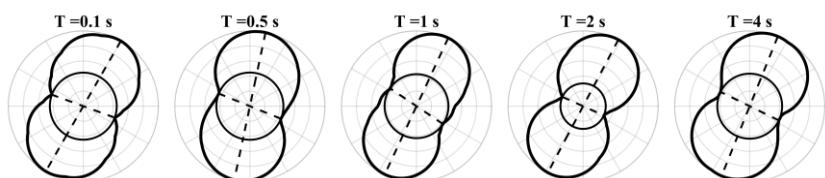

Directionality

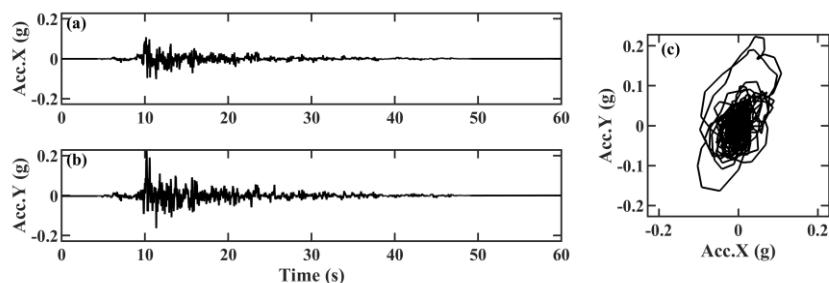

Arias intensity

Spectral demand over all horizontal directions

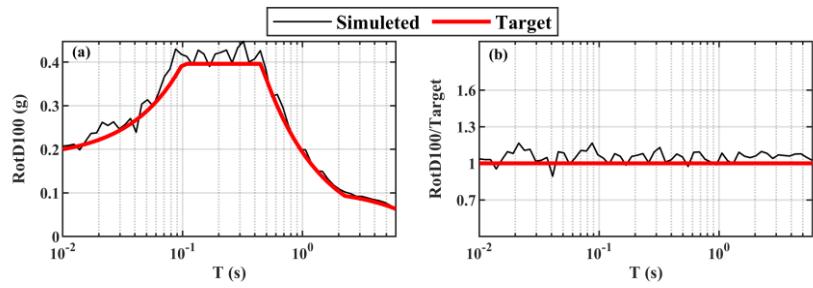

Acceleration time history

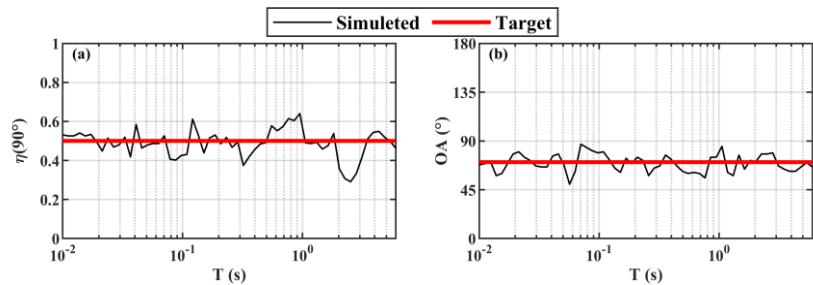

No. 8

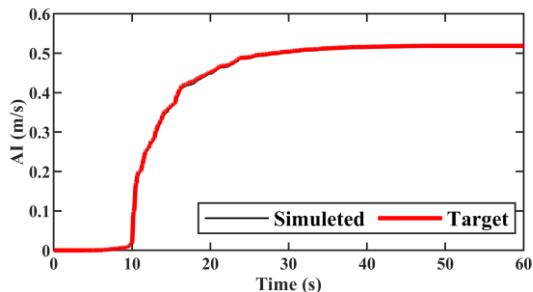

RotD100 response spectrum

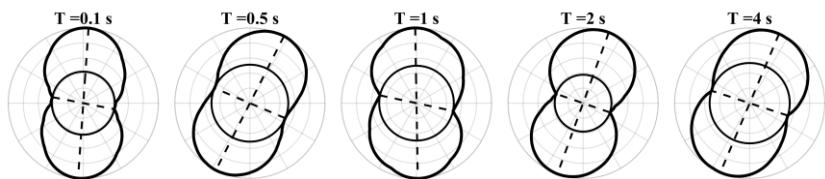

Directionality

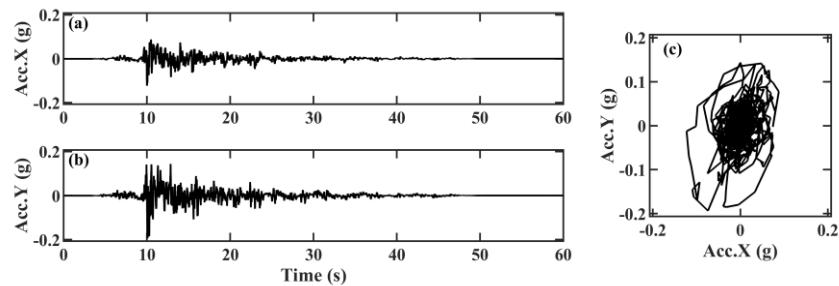

Arias intensity

Spectral demand over all horizontal directions

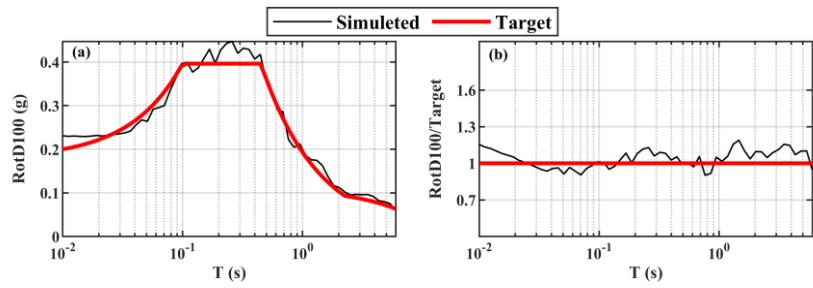

Acceleration time history

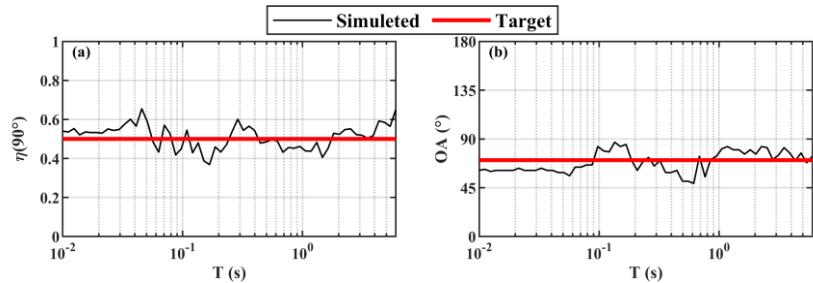

No. 9

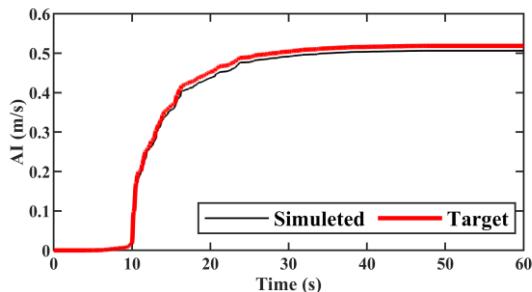

RotD100 response spectrum

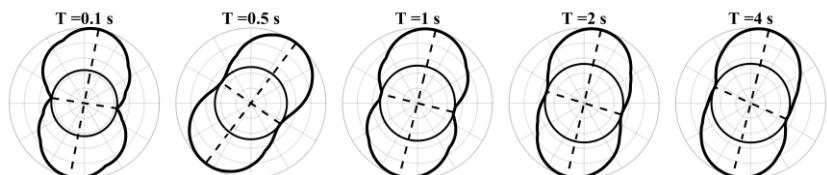

Directionality

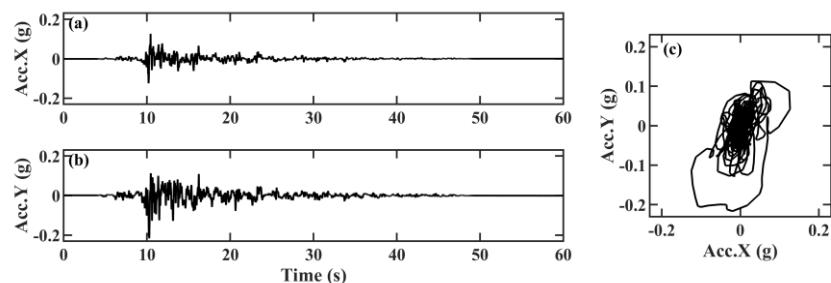

Arias intensity

Spectral demand over all horizontal directions

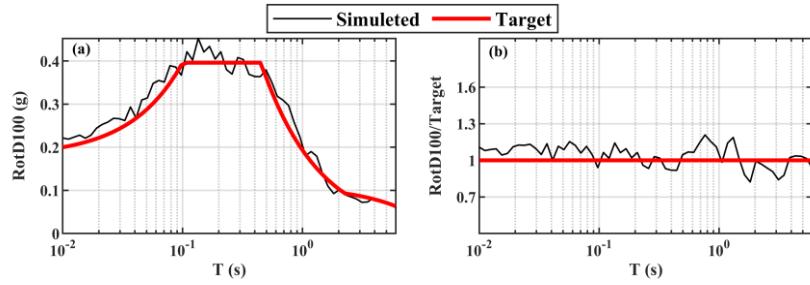

Acceleration time history

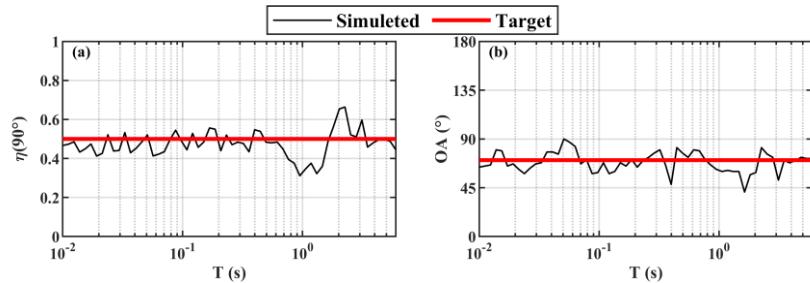

No. 10

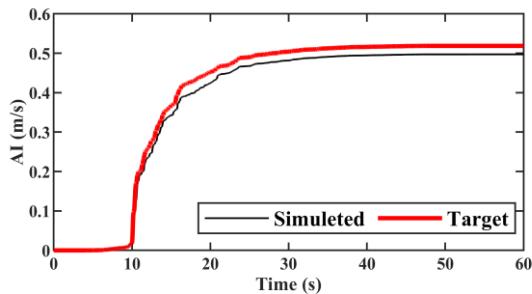

RotD100 response spectrum

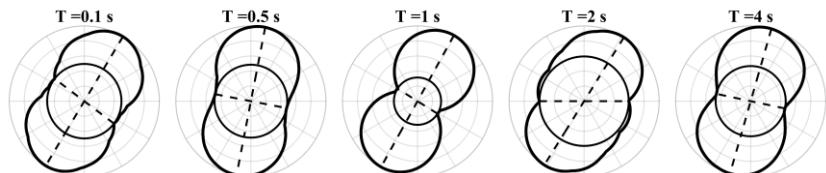

Directionality

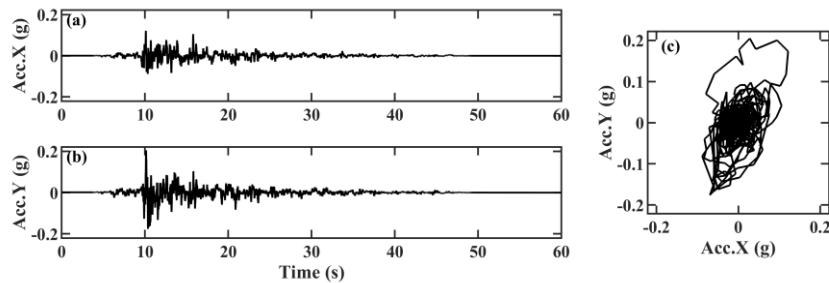

Arias intensity

Spectral demand over all horizontal directions

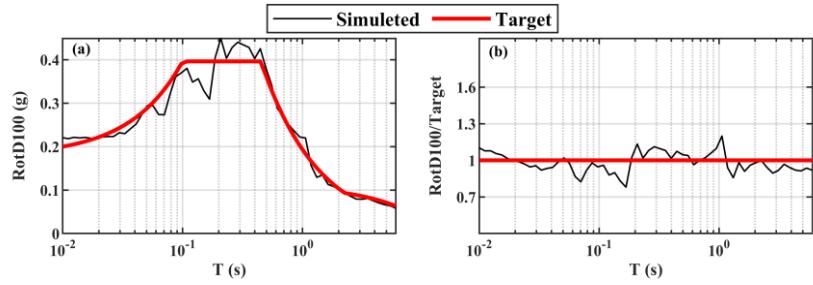

Acceleration time history

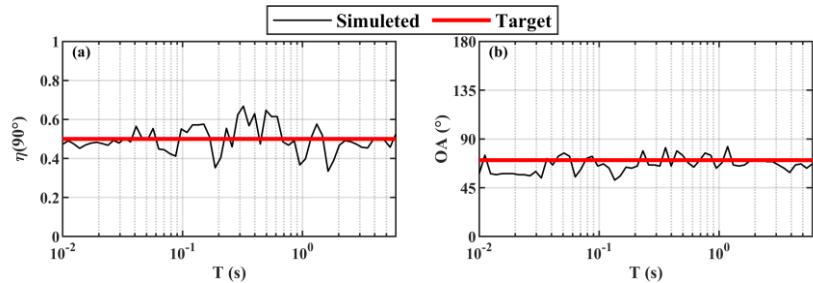

No. 11

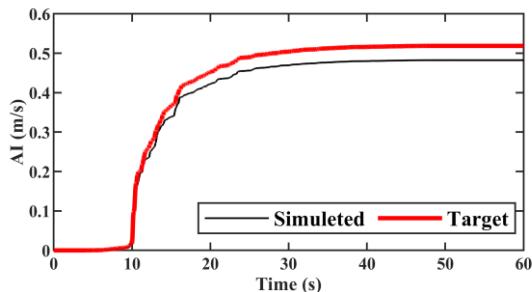

RotD100 response spectrum

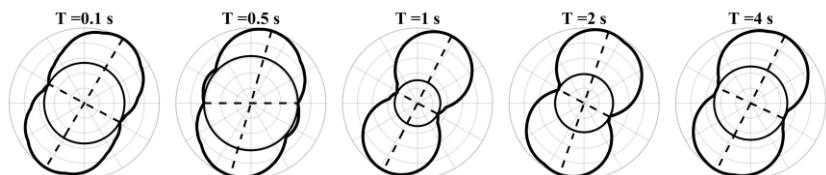

Directionality

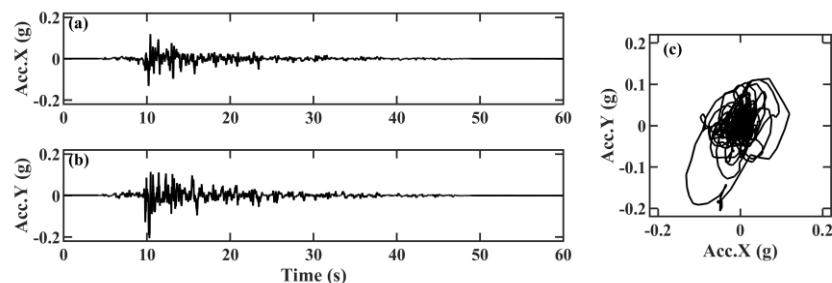

Arias intensity

Spectral demand over all horizontal directions

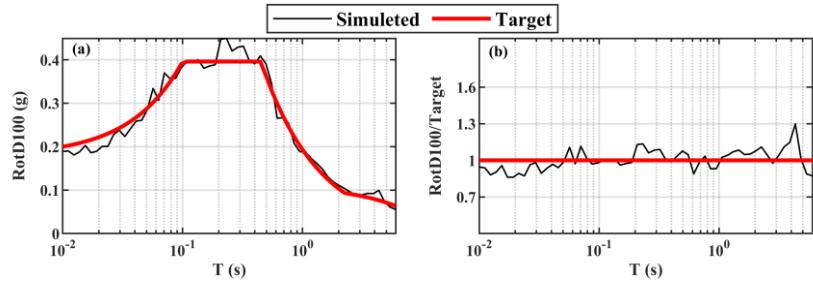

Acceleration time history

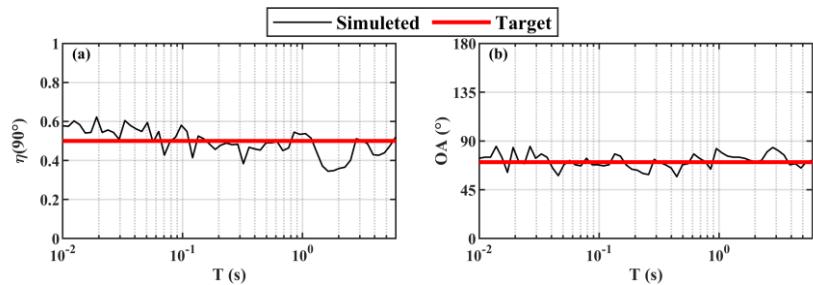

No. 12

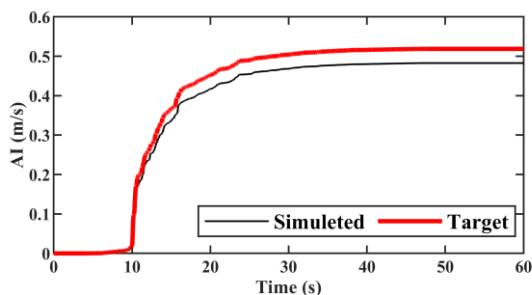

RotD100 response spectrum

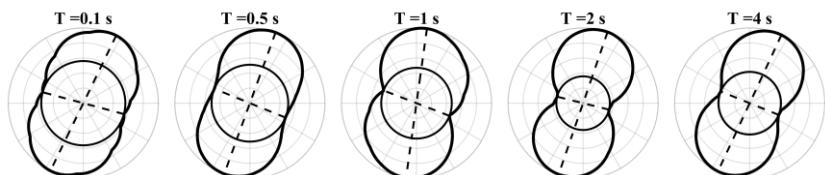

Directionality

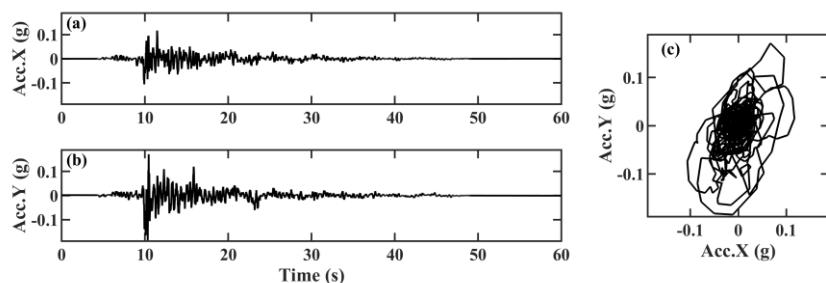

Arias intensity

Spectral demand over all horizontal directions

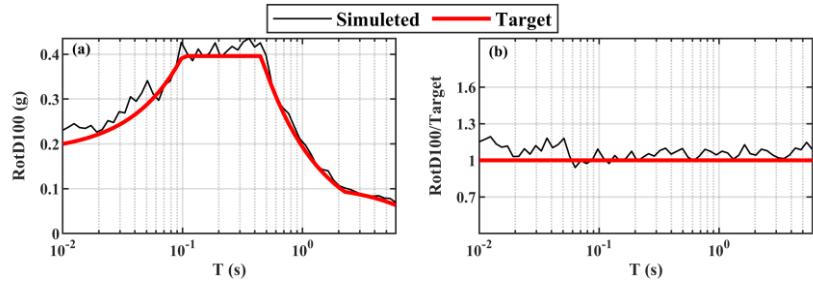

Acceleration time history

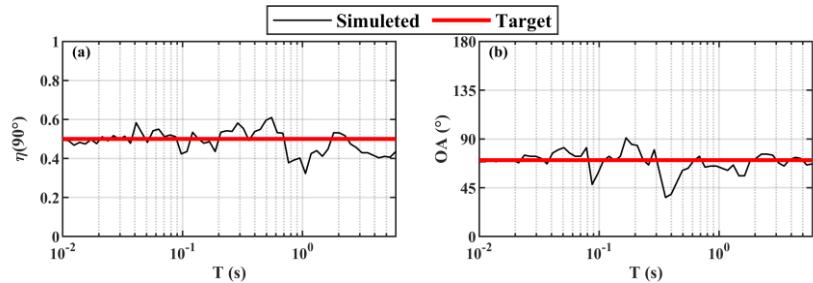

No. 13

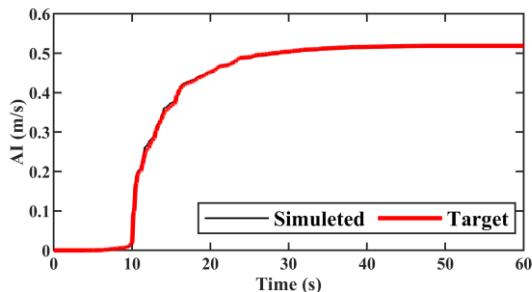

RotD100 response spectrum

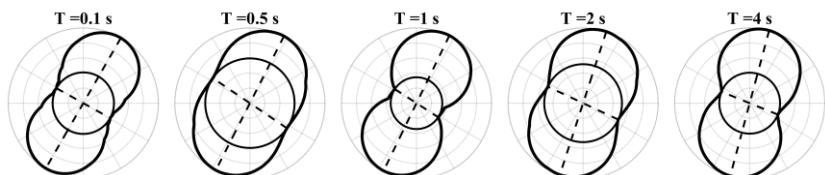

Directionality

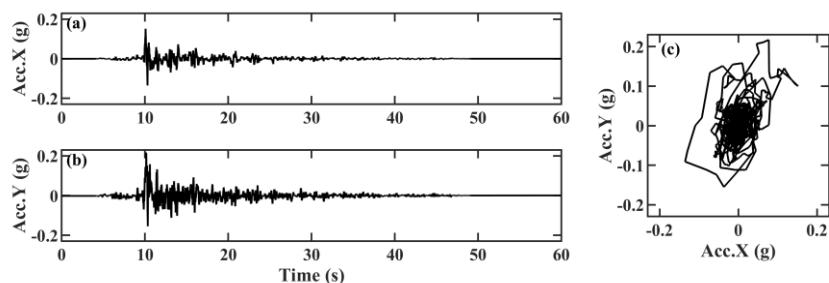

Arias intensity

Spectral demand over all horizontal directions

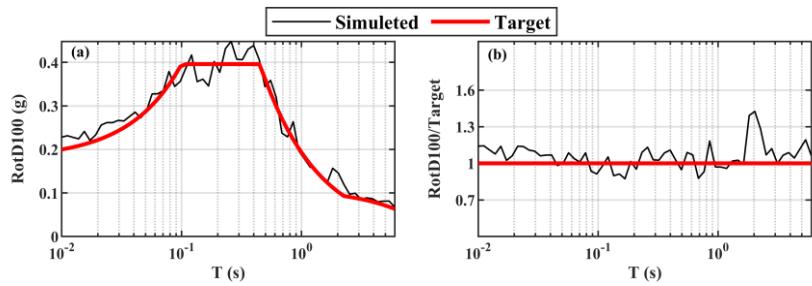

Acceleration time history

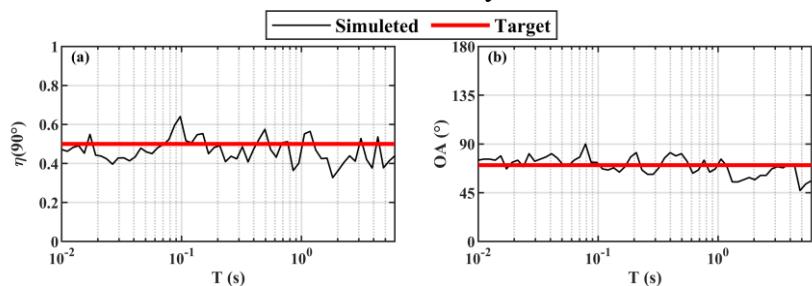

No. 14

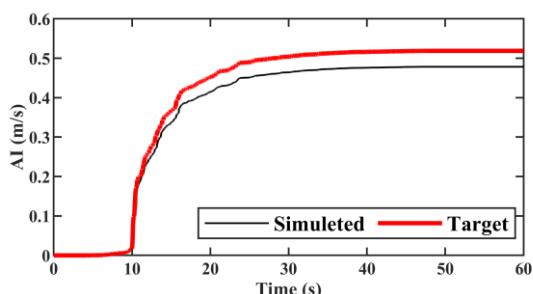

RotD100 response spectrum

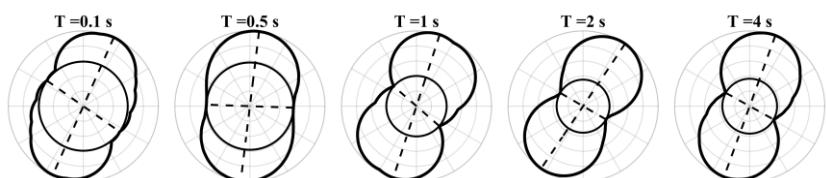

Directionality

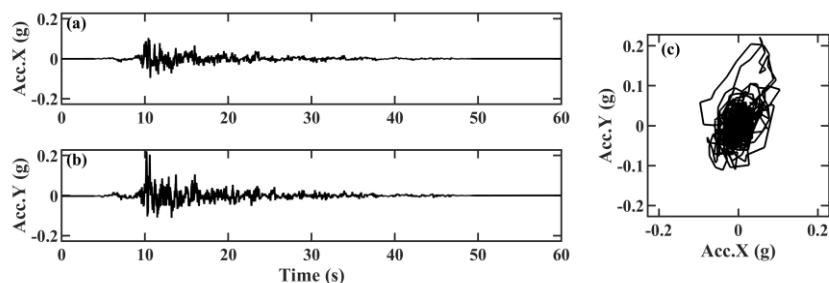

Arias intensity

Spectral demand over all horizontal directions

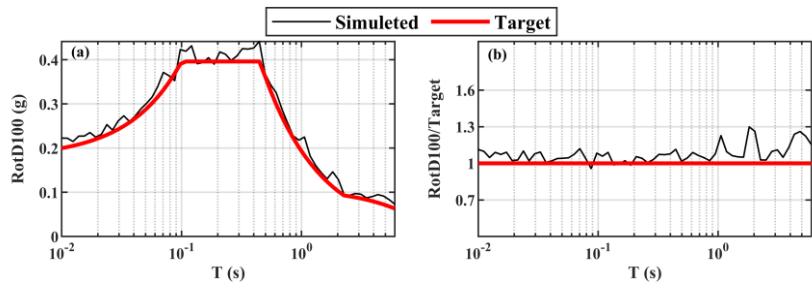

Acceleration time history

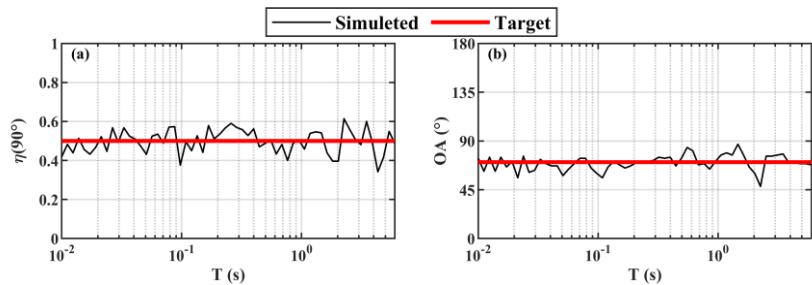

No. 15

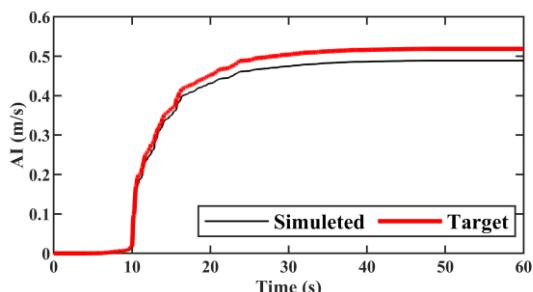

RotD100 response spectrum

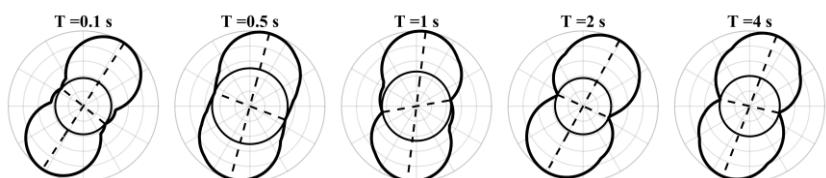

Directionality

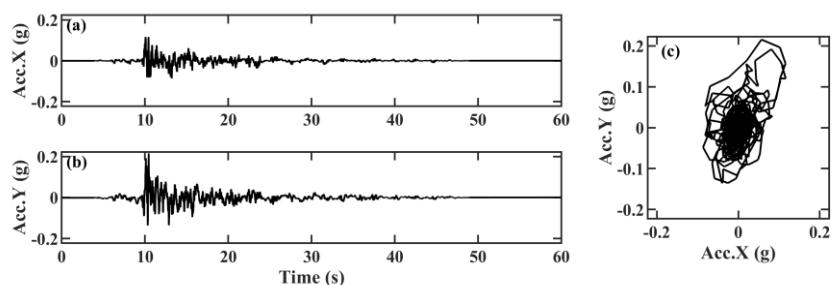

Arias intensity

Spectral demand over all horizontal directions

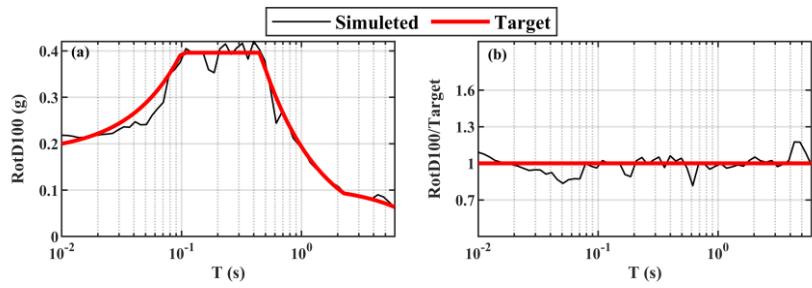

Acceleration time history

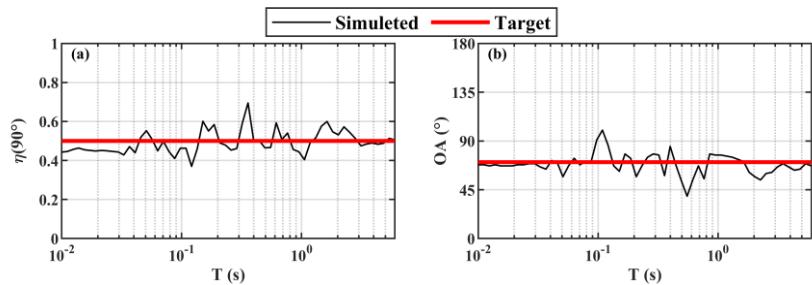

No. 16

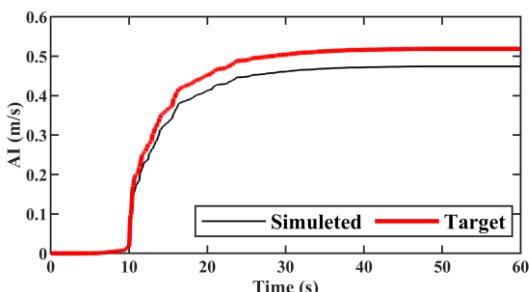

RotD100 response spectrum

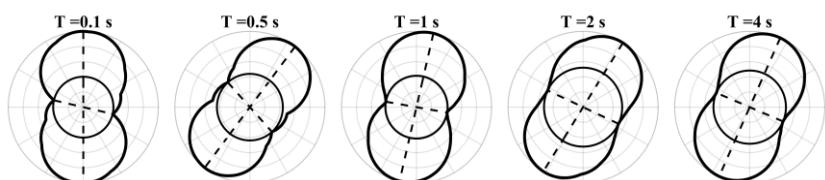

Directionality

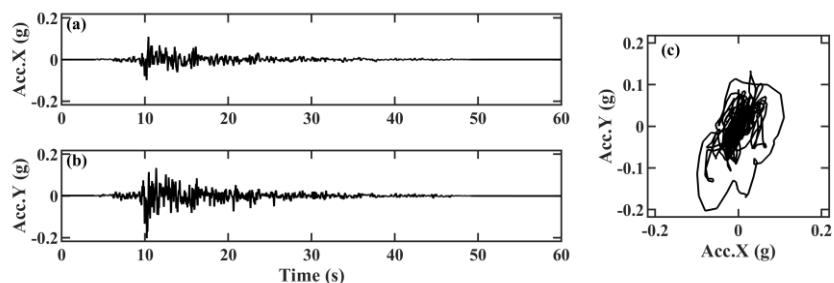

Arias intensity

Spectral demand over all horizontal directions

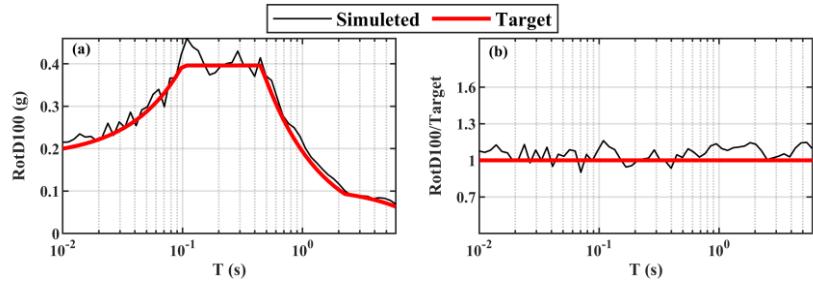

Acceleration time history

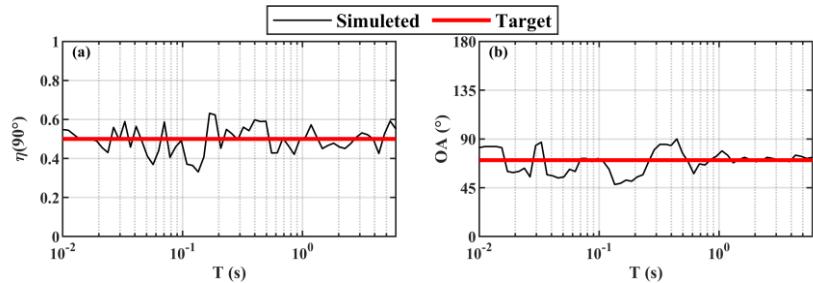

No. 17

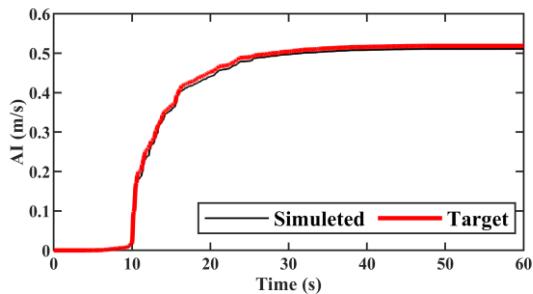

RotD100 response spectrum

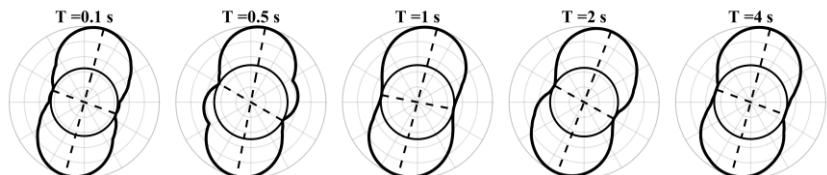

Directionality

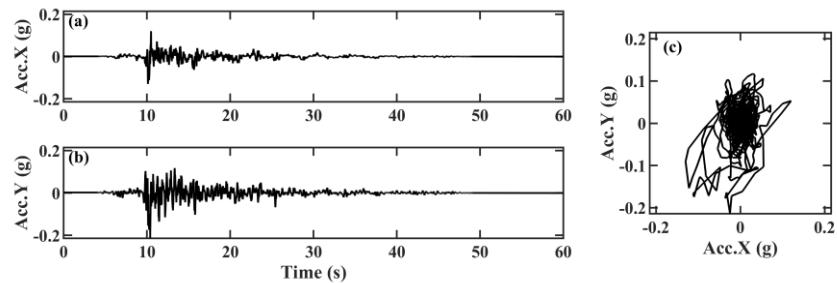

Arias intensity

Spectral demand over all horizontal directions

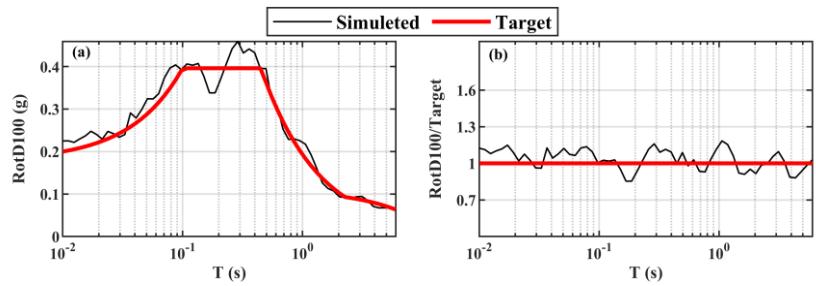

Acceleration time history

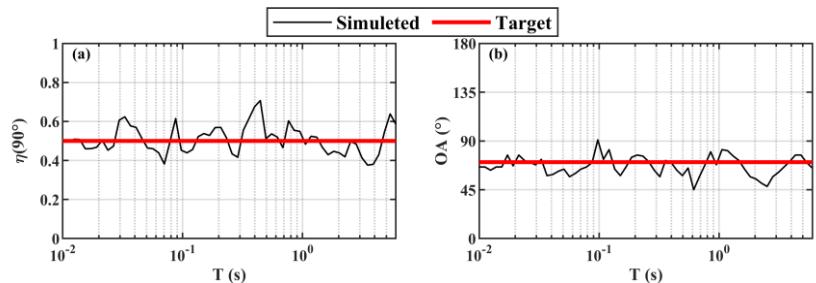

No. 18

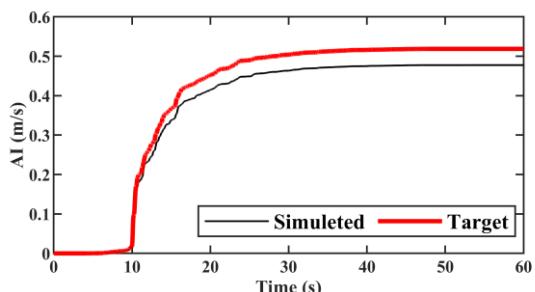

RotD100 response spectrum

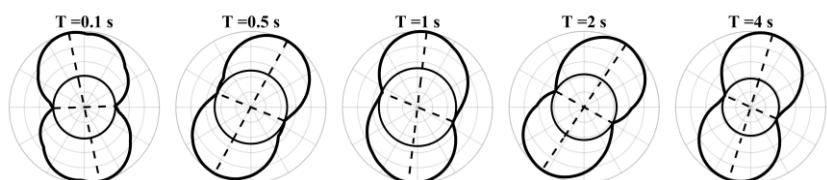

Directionality

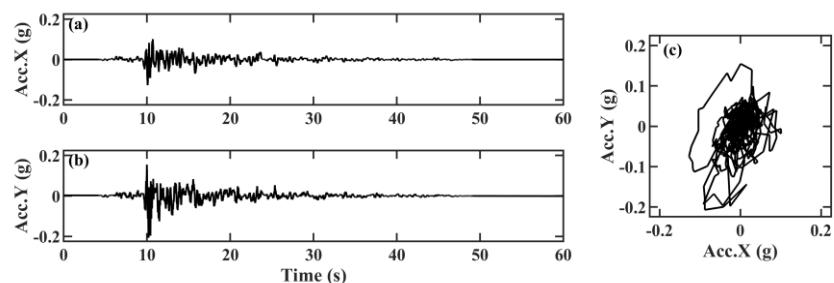

Arias intensity

Spectral demand over all horizontal directions

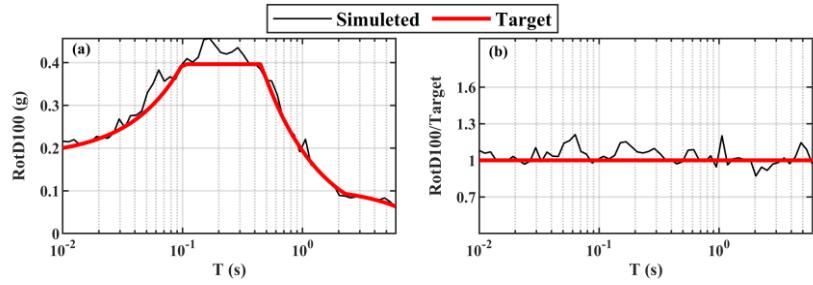

Acceleration time history

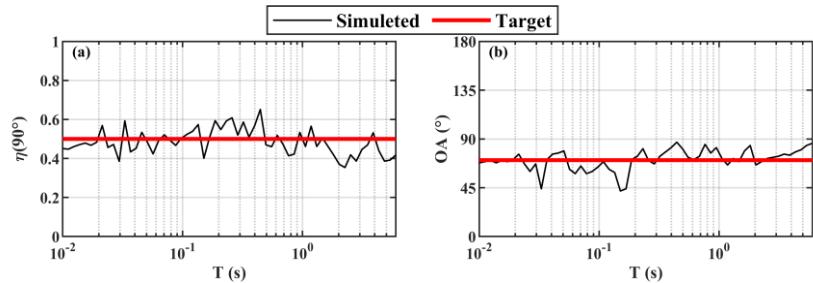

No. 19

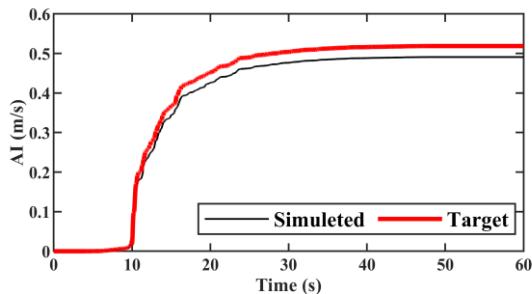

RotD100 response spectrum

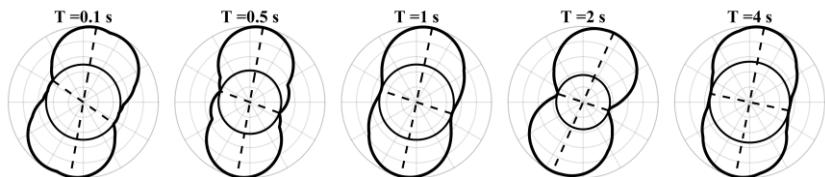

Directionality

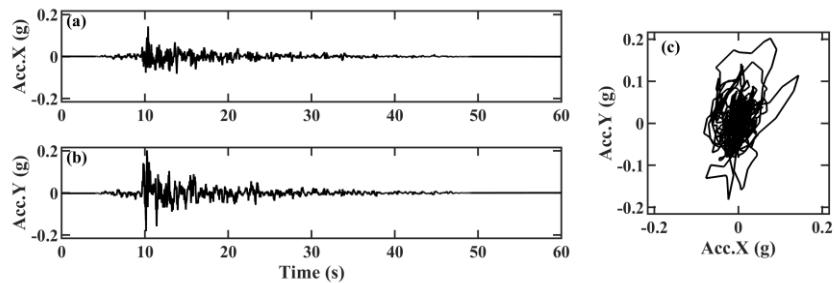

Arias intensity

Spectral demand over all horizontal directions

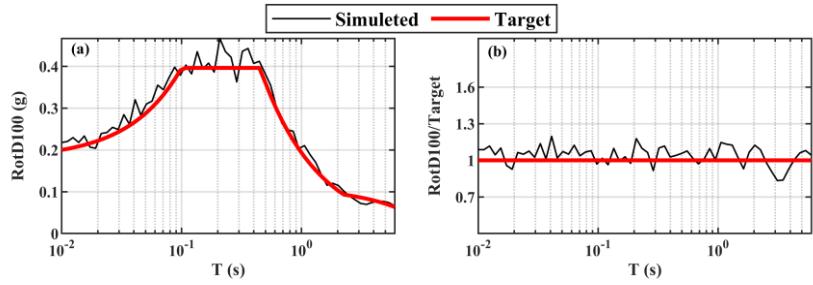

Acceleration time history

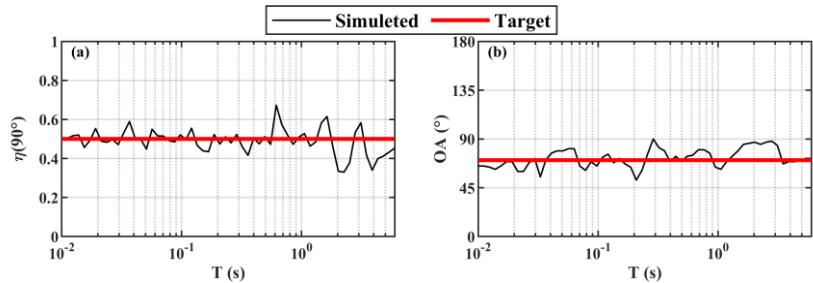

No. 20

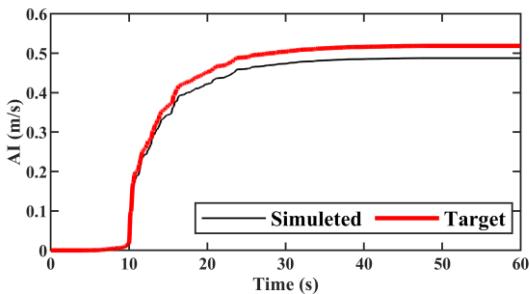

RotD100 response spectrum

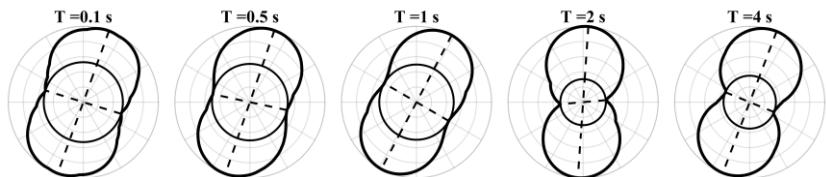

Directionality

Arias intensity

Spectral demand over all horizontal directions

Acceleration time history
